- Dam Remediation

Case Study 1

- Estee Timbers
- The dam is used to collect water used in case of a fire on the property.
- The dam was heavy polluted. Very bad smell coming from the dam.
- Problems with blockages when trying to run the hoses.

- Estee Timbers dam before the treatment

- Estee Timbers dam after two weeks of treatment

Notice signs of the waste and weeds breaking down, and water starting to clear

- Estee Timbers dam after 4 weeks of treatment

Further breakdown, and clearing of the weeds, and waste.
Very little smell at this point, and water much clearer when pumped

- Estee Timbers dam after 4 weeks of treatment

Further breakdown, and clearing of the weeds, and waste.
Very little smell at this point, and water much clearer when pumped

- Estee Timbers dam after 6 weeks of treatment

Signs of the dam starting to clear

- Estee Timbers dam after 8 weeks of treatment

Dam is clear

- Estee Timbers dam
